The advice I would give a student is stay on top of the Synthesis homework and get ahead of Proof Portfolios and have fun and if you don't get it don't give up.

Page 5

6. (5 points) What advice would you give to a student taking MTH 210 next semester? (Your answer to this question will be cut off from your exam so you can answer anonymously.)

1) Do the proof portfolio problems as soon as you can, and turn in as many drafts as you can.

2) Make notecards with all of the important definitions and concepts

3) KNOW HOW TO NEGATE A CONDITIONAL STATEMENT !

Page 5

Take careful notes so you can review them. Most proof problems can be modeled on examples from class. Don't give up. Practice LATEX. Take a break and come back if you get stuck. Start your proof problems ASAP so you have time to get stuck. Savor the "ah-ha!" moments.

Do all of the synthesis and preview activities! They help immensely and you can earn full credit with in-class corrections. It is okay to mess up on the mastery quizzes. You have 5 tokens that can be used for this type of thing! Lastly, take good notes and try not to procrastinate on the proof portfolio.

Do the proof and the homework and the pre-classes. If you do your work this class is easy.

Also ask for help no question is dumb. Finally its okay to mess up and say dumb things.

Also never forget the negation of a conditional statement

6. (5 points) What advice would you give to a student taking MTH 210 next semester? (Your answer to this question will be cut off from your exam so you can answer anonymously.)

→ Know how to negate a conditional statement

→ Do your proof portfolio problems.

→ Know your classmates names → extra credit.

Keep good notes, especially on proof techniques.

Ask questions if you're feeling lost

and don't get discouraged if you don't see something right away. Stay on top of the portfolio!

I would tell them to do their proof problems in a tidy and organized manner. Return every deadline.

6. (5 points) What advice would you give to a student taking MTH 210 next semester? (Your answer to this question will be cut off from your exam so you can answer anonymously.)

Many things you will cover will be frustrating and brand new ways of thinking. So use as many resources as you can to help yourself, such as the professor, classmates, and whatever else that will help you succeed

Don't memorize anything other than definitions, proof techniques, & problem solving strategies. This class is basically a logic puzzle course. If you try to memorize proofs in their entirety you will have a bad time.

Also, it is totally normal to get stuck a lot.

Page 5

Don't be afraid to ask for help!

6. (5 points) What advice would you give to a student taking MTH 210 next semester? (Your answer to this question will be cut off from your exam so you can answer anonymously.)

Don't try to logically understand any of this. Memorize definitions and use them. The formulas point the way.

6. (5 points) What advice would you give to a student taking MTH 210 next semester? (Your answer to this question will be cut off from your exam so you can answer anonymously.)

Take the synthesis and preview activities seriously. They help quite a bit!

6. (5 points) What advice would you give to a student taking MTH 210 next semester? (Your answer to this question will be cut off from your exam so you can answer anonymously.)

Do the proof portfolio as early as possible, because the deadlines show up faster than you think they will.

Keep up on the proof portfolio-submit drafts every week. Also, if you're ever confused GO TO OFFICE HOURS! Dr. Keough is incredibly friendly and helpful. You won't regret it. And don't forget your tombstones !

Page 5

6. (5 points) What advice would you give to a student taking MTH 210 next semester? (Your answer to this question will be cut off from your exam so you can answer anonymously.)

My advice is to do the homework diligently and keep up on homework/synthesis activities / proof deadlines. If you don't class will be stressful. Also, when you run stuck use your resources. The prof. is there to help. Don't be afraid to ask, it might save you a few hours and lots of stress.

Page 5

6. (5 points) What advice would you give to a student taking MTH 210 next semester? (Your answer to this question will be cut off from your exam so you can answer anonymously.)

To look up LaTeX symbol charts and to just do proofs because they aren't that hard, especially with all the available help

Page 5

6. (5 points) What advice would you give to a student taking MTH 210 next semester? (Your answer to this question will be cut off from your exam so you can answer anonymously.)

Try to figure out each proof for the portfolio and turn in a rough draft even if you think it is completely wrong. It can help you see where to improve and it gets points for effort.
